Comprehension:

Read the passage and answer the questions below.

On a mid-September day, British climbers Rachel Kelsey and Jeremy Colenso were climbing in the Swiss Alps. They were both experienced climbers and when they started, the weather was good. They reached the summit but as they started the climb down, an electric storm struck the mountain.

Snow began to fall, making it difficult to see where they could put their hands and feet on the rock. After several frightening minutes, they found a narrow ledge and climbed on to it, hoping the snow would stop and they could climb down.

The snow did not stop and the temperature dropped to -5 °C. They decided that they had to get help. Rachel had brought her mobile phone with her. She was unable to contact the mountain rescue service on her mobile phone and the only contact number she had were in London. She sent a text message at 1.30 am to five friends in the UK. It read: 'Need heli rescue off north ridge of Piz Badile, Switz'. They were all asleep.

At 5.00 am Avery Cunliffe got the message. He jumped into action and immediately contacted the rescue services in Geneva. He texted Rachel back saying: 'I'm on the case'. Even then, rescue was impossible because of the treacherous weather and the mountain rescue team had to send a text message to Miss de Kelsey telling her she would have to spend a second night on the mountain. They could reach the stranded couple only at 8.15 am the next day. At about 1.00 pm they were lifted off the mountains in helicopters.

SubQuestion No : 17

Q.17 Rachel and Jeremy could not climb down because:

Ans

✗ 1. They had forgotten the route

✗ 2. The mountain was very slippery

✔ 3. They could not see properly in the snowfall

✗ 4. It was very cold
